SUMMARY

Results-driven Data Analyst and Technical Business Analyst with 5+ years turning complex datasets into decisions, cutting analysis time 60% through pipeline redesign, lifting forecasting accuracy 12% via SQL and Tableau modeling, and building dashboards that raised operational efficiency 15%. Skilled in requirements elicitation, stakeholder engagement, and end-to-end analytical delivery using Python, SQL, Power BI, Tableau, and Excel. Experienced in agile environments (Jira) and cross-functional collaboration. Passionate about leveraging data and emerging technologies to solve real-world business challenges.

EXPERIENCE

Business Data Analyst

Sigel Advisory Partners **August 2025 - Present, Abuja, Nigeria.**

- Led requirements-gathering workshops with 6+ stakeholders to define data-driven business needs and technical specifications, reducing ambiguity and cutting rework by ~20%.
- Translated complex business requirements into structured workflows, user stories, and data pipelines that reduced system development lead time by 15%.
- Designed and executed data quality checks across structured datasets, improving output reliability and supporting strategic decisions with 95%+ data accuracy.
- Delivered analytical reports on structured and unstructured data that directly informed 3 major product and business improvement initiatives.
- Applied analytic skills to evaluate over 50 monthly business performance metrics using SQL and Tableau, leading to a 12% improvement in forecasting accuracy and enhanced cross-functional reporting efficiency over an 18-month period.

Business Analyst

Outsource Global Technologies Limited **August 2024 - July 2025, FCT/Abuja, Nigeria**

- Analyzed business processes across 5 operational areas, identifying improvement opportunities that resulted in a 20% reduction in manual processing time.
- Collaborated with cross-functional teams of 8+ members to define project requirements and objectives, ensuring alignment across business and technical stakeholders.
- Produced weekly data analysis reports and dashboards used by senior leadership for strategic planning, improving decision-making turnaround by 25%.
- Assisted in designing and implementing workflow optimization strategies that streamlined 3 core processes and reduced average task completion time by 18%.

Data Science

ParadigmNest **September 2022 - October 2023, Remote**

- Engineered and deployed ML models (Random Forest, XGBoost, SVM) for a personalized recommendation engine, improving model accuracy by 22% over the baseline model.
- Cleaned and preprocessed datasets from 10+ clients, ensuring data consistency and quality standards ahead of analysis and reporting cycles.
- Redesigned the end-to-end data processing pipeline, reducing analysis time by 60% within 3 months and increasing team productivity by 35%.
- Maintained strict data quality standards across all deliverables, achieving zero data-integrity incidents across a 13-month engagement.
- Monitored data pipelines daily using Python and Airflow to ensure integrity, identify anomalies, and resolve issues instantly, sustaining 100% uptime and supporting 15 monthly client deliverables over a 13-month period.

Data Analyst (Contract)

Zoena Cleaning Services **January 2023 - July 2023, Edmonton, Canada**

- Built 3 interactive Tableau dashboards providing real-time operational insights, resulting in a 15% increase in operational efficiency.
- Conducted exploratory data analysis in Tableau, uncovering key cost-reduction trends that contributed to a 10% reduction in operational expenses.
- Presented data-driven reports to leadership that drove a 10% increase in marketing ROI and a 25% improvement in customer retention.
- Developed SQL and Tableau-based data models that improved report generation efficiency by 25% over the 6-month baseline.

PROJECT

HOUSING PRICE PREDICTION USING WEB SCRAPING

Academic Project

- Extracted housing data from a real estate listing website using Python (BeautifulSoup), handling multi-page navigation and semi-structured HTML. Cleaned and structured datasets for analysis, then built a predictive model to estimate property prices, enabling insights into housing trends and supporting data-driven decision-making.

AI Medcare - Medical Chatbot Project

Outsource Global Hackathon • github.com/M-tech1/AI-Healthcare-Diagnosis-system

- Collaborated with a team to develop an AI-powered medical chatbot capable of diagnosing health issues through user interactions.
- Leveraged a state-of-the-art AI API for natural language processing and machine learning to provide accurate and reliable preliminary diagnoses, enhancing patient engagement and streamlining the triage process.
- Authored a comprehensive SRS document for a cross-functional team of 5, aligning the product designer and development team on system requirements — reducing revision rounds by an estimated 30% and accelerating delivery.

Splendor Hotel Analysis

public.tableau.com/app/profile/chinedu.egbuna/viz/SHGAnalysis/Dashboard22

- Conducted a comprehensive data analysis of Splendor hotel data using Tableau.
- Created interactive dashboards to visualize key metrics such as average daily rates, revenue loss and gain, and average nights stayed by customers
- Identified trends and patterns in booking behavior, seasonal variations, and customer preferences.
- Utilized advanced Tableau features such as calculated fields, parameters, and custom filters to enhance data insights.
- Presented findings through clear and intuitive visualizations, aiding in strategic decision-making and operational improvements

SALES ANALYSIS DASHBOARD

public.tableau.com/app/profile/chinedu.egbuna/viz/MySalesAnalysis/Dashboard2

- Uncover sales trends, customer behavior, and shipping insights. Visualize sales by category, segment, and shipping mode. Track performance over time. Interactive and data-driven decision-making.
- Developed Sales Analysis Dashboard to provide valuable insights into sales data and track performance over time; resulting in an increase of 15% in sales and 25% in customer retention rates.
- Applied data processing techniques to deliver production-level dashboard with interactive visualization.

EDUCATION

Bachelor of Science in Computer Science

Imo State University • Owerri, Imo State • 2021

CERTIFICATIONS

Data Scientist

Qwasar Silicon Valley • 2023

ALX-T Data Analyst

Udacity • 2022

Data Scientist with Python

Datacamp • 2022

Data Analyst Nanodegree

Data Analyst • 2022

SKILLS

Data Analysis: Data Cleaning, Data Analysis, SPSS, Python (Programming Language), Data Preparation, Matplotlib, Pandas, Data Visualization, Communication, MS Excel.

Data Visualization Tools: PowerBI, Tableau.

Database and Data Management: Database Design, Relational Databases, MySQL

Data Science/Machine Learning: Data Science, Machine Learning, Predictive Modelling, Predictive Analysis, NumPy
